VASU AGRAWAL

Noida, India | agrvasu05@gmail.com | github.com/agrvasu05 | linkedin.com/in/vasu-agrawal-ba985628b | agrvasu05.github.io

Summary

Final-year IT student who finds the right companies, reaches the person who decides, and builds the systems that make outreach repeatable and measurable.

Education

Jaypee Institute of Information Technology, Noida 2023 – 2027
B.Tech, Information Technology · CGPA: 7.74 / 10
Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Indian Institute of Technology Madras (online) 2023 – 2024
BS in Data Science · Foundation Level

Experience

IndiaUnbox — *Technology Intern (sourcing for global buyers)* May 2026 – Jul 2026 · Remote

- Built the supplier database behind the sourcing team: **10,000+ supplier records** collected from IndiaMART and ThomasNet, then cleaned, deduplicated and validated.
- Automated the company LinkedIn page for lead generation: a daily post for two weeks from a 28-post queue on QC, MOQs, landed cost, payment terms and Incoterms.

Projects

Outbound engine — designed and ran it | *Python, Verifalia API, Gmail* Oct 2026

- Repeatable outbound process: screen hiring startups, find each company's published address, confirm the mailbox, write one company-specific line, send with one follow-up and track replies.
- First campaign: **108 companies screened → 33 with a published address → 21 strong fits → 10 sent** on day one.
- Rules: founders first, confirmed addresses only, an opt-out line on every email and an automatic do-not-contact list.

Audience growth on data — my own YouTube & Instagram channels 2026

- Choose niches and topics by outlier analysis: videos scored by views against channel size across hundreds of examples.
- Tested formats instead of guessing: original code-animated reels got **~7× the views** of the earlier format and cut the skip rate from **58% to 25%**.
- Production runs on my own automated pipeline at **under $1 a video**.

Strengths

Prospecting: lead research, fit scoring, email verification, decision-maker targeting

Outreach: cold email copy, personalisation at scale, follow-up cadence, reply tracking

Analysis: funnel metrics, A/B tests, Python, Pandas, SQL

Automation: Make.com, Python scripts, Gmail and REST APIs, scheduled workflows

Achievements & Publications

- **1st Place**, Hackin' Winters Hackathon (Jan 2025).
- Co-author, "AI-Driven Performance Management and Appraisal Systems," Routledge, 2025.
